INSTRUCTIONS FOR USE – EN

DEVICE DESCRIPTION

BiomarC Fiducial Marker is a sterile, pyrogen free, single patient use, pyrolytic carbon coated or gold discrete marker that is visible on standard radiographs, CT, CBCT, ultrasound and Magnetic Resonance Imaging (MRI). All markers are visible on kV OBI. BiomarC *EX* and *Gold* markers are also visible on MV OBI. BiomarC Fiducial Markers are supplied preloaded in a delivery device system or in individual packages which may be used with commercially available delivery devices per the table below.

Table 1

BiomarC Fiducial Marker	Minimum Delivery Needle Internal Diameter
040158 – 1 × 5 mm *Enh*	0.81 mm (.032")
040145 – 1 × 5 mm *EX*	1.1 mm (.041")
040129 – 0.9 × 3 mm *Gold*	0.91 mm (.036")

INDICATIONS FOR USE

BiomarC Fiducial Markers are intended to be implanted into the body to accurately visualize and constitute the reference frame for stereotactic radiosurgery and radiotherapy target localization.

CONTRAINDICATIONS

Patients who have an allergic response to gold should not use BiomarC *Gold* Fiducial Marker (Catalog Numbers: 040118, 040125, 040129, 040141).

WARNINGS

- Do not insert BiomarC Fiducial Marker into blood vessels.
- Do not insert a suture needle through the hole of the BiomarC *Secure* Fiducial Marker (Catalog Number: 040150). Only the suture material is to be in contact with the marker.
- Do not use metallic sutures with BiomarC *Secure* Fiducial Marker.
- Using metal surgical instruments could damage BiomarC's carbon coating.

PRECAUTIONS / UNDESIREABLE SIDE EFFECTS

- Only physicians qualified in the appropriate surgical techniques and procedures should use this device.
- Minimally invasive instruments may vary in size from manufacturer to manufacturer. When minimally invasive instruments and accessories from different manufacturers are employed together and in conjunction with the BiomarC Fiducial Marker in a procedure, **verify compatibility prior to the initiation of the procedure**.
- Do not use in the presence of infection.
- Though rare, hypersensitivity, immune response or foreign body reaction is possible with the use of BiomarC Fiducial Markers. As with any implanted device, the implant site should be monitored for any sign of irritation or reaction following the surgical procedure.
- Infection is a possible adverse reaction as a result of any surgical procedure. Physicians should monitor patient to ensure no sign of infection following the procedure.
- When sutures are used together with BiomarC *Secure* Fiducial Marker, verify compatibility prior to initiation of the procedure.
- BiomarC Fiducial Marker is supplied sterile in a sealed package and is intended for single use only. Reprocessing, resterilization, or reuse of single use devices may create a risk of contamination and/or cause patient infection or cross-infection, including, but not limited to, the transmission of infectious disease(s) from one patient to another. Contamination of this device may lead to injury, illness or death of the patient. Carefully examine each unit to verify that neither the contents nor the sterile package has been damaged in shipment. **DO NOT USE** if damaged.

- Unless the packaging is damaged, BiomarC Fiducial Marker will remain sterile until used or expired.
- After use, the device may be a potential biohazard. Handle accordingly and dispose of in accordance with accepted medical practice and applicable local requirements.

POSSIBLE ADVERSE EVENTS

Possible adverse reactions (e.g., infection, allergic reaction to gold) that may be associated with the use of the BiomarC Fiducial Marker are similar to those associated with the use of other marking devices. The patient should be counseled to report adverse events to the treating physician. **Physicians should report device-related adverse events to Carbon Medical Technologies, Inc. at info@carbonmed.com and the competent authority of the Member State**.

MRI INFORMATION

MR CONDITIONAL

BiomarC delivery devices are not compatible with Radiofrequency Fields. While the BiomarC devices may be used in the MRI environment they will not be used during the actual MR imaging. The patient will be moved out of the magnet bore and then the delivery device will be used to place the marker. As such, they will not be exposed to an MR imaging procedure or RF heating.

The BiomarC Fiducial Marker is MR Conditional

Non-clinical testing demonstrated that the BiomarC Fiducial Marker is MR conditional. A patient with this device can be scanned safely, immediately after placement under the following conditions:

- Static magnetic field of 3-Tesla or less
- Maximum spatial gradient magnetic field of 36,000-Gauss/cm (extrapolated) or less
- Maximum MR system reported, whole body averaged specific absorption rate (SAR) of 4-W/kg for 15 minutes of scanning (i.e., per pulse sequence)
- First Level Controlled Operating Mode of operation for the MR system

MRI-Related Heating

In non-clinical testing the BiomarC Fiducial Marker produced the following temperature rise during MRI performed for 15-min of scanning (i.e., per pulse sequence) in a 3-Tesla MR system (3-Tesla/128-MHz, Excite, HDx, Software 14X. M5, General Electric Healthcare, Milwaukee, WI):

MR system reported, whole body averaged SAR	2.9-W/kg
Calorimetry measured values, whole body averaged SAR	2.7-W/kg
Highest temperature change	1.5°C
Temperature scaled to whole body averaged SAR of 4-W/kg	2.1°C

Artifact Information

MR image quality may be compromised if the area of interest is in the exact same area or relatively close to the position of the BiomarC Fiducial Marker. Therefore, optimization of MR imaging parameters to compensate for the presence of this device may be necessary. The maximum artifact size (i.e., as seen on the gradient echo pulse sequence) extends approximately 5-mm or less relative to the size and shape of the BiomarC Fiducial Marker.

Artifact size is dependent on the type of pulse sequence used for imaging (larger for gradient echo pulse sequences and smaller for spin echo pulse sequences), the frequency encoding direction (larger if the frequency encoding direction is parallel to the device and smaller if it is perpendicular to the device), and the size of the field of view. Positional errors and artifacts on MR images will be smaller for MR systems with lower static magnetic field strengths using the same imaging parameters as those operating at higher static magnetic field strengths.

SUMMARY OF SAFETY AND CLINICAL PERFORMANCE (SSCP)

For additional information, the SSCP is available in the European database on medical devices (EUDAMED) and is linked to the Basic UDI-DI. Visit https://ec.europa.eu/tools/eudamed and search **Basic UDI-DI: 0858015005002UT**.

INSTRUCTIONS FOR USE

Verify compatibility of all minimally invasive instruments and accessories prior to use (refer to **Precautions).**

Inspect the BiomarC Fiducial Marker package to ensure that neither the package integrity nor the contents have been compromised or damaged. The product is sterile through the expiration date unless the seal is broken.

BiomarC Fiducial Marker – Individually Packaged

1. Using standard sterile aseptic technique, remove the BiomarC Fiducial Marker from the package.
2. Take a single BiomarC Fiducial Marker and insert it into a commercially available delivery device with stylet having a minimum internal diameter per Table 1.
3. Advance stylet into hub of the device so that BiomarC Fiducial Marker is visible at the distal end of the device.
4. When placement of the BiomarC Fiducial Marker is desired, advance the delivery device to the targeted site. Locate the target area using appropriate imaging technique.
5. Completely advance the stylet forward and then rotate 180° to release the BiomarC Fiducial Marker from the delivery device.
6. With the stylet completely advanced, remove entire delivery device.
7. Dispose of the device and stylet properly.
8. Confirm final marker position with desired imaging.
9. Repeat above steps with additional BiomarC Fiducial Markers to completely constitute the desired reference frame.

BiomarC Fiducial Marker – Preloaded System

1. Using standard sterile aseptic technique, remove the BiomarC Fiducial Marker System from the package. **REMOVE THE SHEATH**. Inspect the device for signs of damage.
2. When placement of the BiomarC Fiducial Marker is desired, advance the device to the targeted site. Locate the target area using appropriate imaging technique.
3. Remove the stylet lock, if applicable.
4. Completely advance the stylet forward and then rotate 180° to release the BiomarC Fiducial Marker from the device.
5. With the stylet completely advanced, remove entire delivery device.
6. Dispose of the delivery device properly.
7. Confirm final marker position with desired imaging.
8. Repeat above steps with additional BiomarC Fiducial Markers to completely constitute the desired reference frame.

BiomarC *Secure* Fiducial Marker – Individually Packaged

1. Using standard aseptic technique, remove the BiomarC *Secure* Fiducial Marker from the package.
2. Locate the target area.
3. Secure marker to targeted site using suture of choice. **Do not insert a suture needle through the suture hole of the BiomarC *Secure* Fiducial Marker**.
4. Repeat above steps with additional BiomarC *Secure* Fiducial Markers to completely constitute the desired reference frame.

HOW SUPPLIED STERILE EO

BiomarC Fiducial Markers are individually packaged and supplied one (1), three (3) or ten (10) packages to a box.

STORAGE

Product should be stored at room temperature.

WARRANTY

The manufacturer warrants that reasonable care has been used in the design and manufacture of this device. This warranty is in lieu of and excludes all other warranties not expressly set forth herein, whether expressed or implied by operation of law or otherwise, including, but not limited to, any implied warranties of merchantability or fitness. Handling and storage of this device as well as factors relating to the patient, diagnosis, treatment, surgical procedures, and other matters beyond the manufacturer's control directly affect the device and the results obtained from its use. The manufacturer's obligation under this warranty is limited to the replacement of this device and the manufacturer shall not be liable for any incidental or consequential loss, damage, or expense directly or indirectly arising from the use of this device. The manufacturer neither assumes, nor authorizes any other person to assume for it, any other or additional liability or responsibility in connection with this device.

Prices and specifications are subject to change without notice.
