# Carbon Medical Technologies and LiNA Medical USA Announce Strategic Collaboration to Support the Commercialization of Durasphere® and InjecSURE®

*St. Paul, MN and Norcross, GA, May 11, 2026* – Carbon Medical Technologies, Inc. (“CMT”) and LiNA Medical USA, Inc. (“LiNA”) today announced a strategic collaboration focused on supporting the commercialization of Durasphere®, an injectable bulking agent indicated for the treatment of stress urinary incontinence in women, and the newly FDA-cleared InjecSURE® System designed to support a standardized and efficient urethral injection procedure. The collaboration brings together CMTs’ expertise in implantable medical devices, urethral bulking technologies, and accessories that support cystoscopic delivery with LiNA’s established commercial presence in women’s health and minimally invasive gynecologic and urologic procedures.

“We are excited to collaborate with LiNA as we expand awareness and access to Durasphere and the InjecSURE system,” said Stephanie Kent, CEO of Carbon Medical Technologies. “LiNA’s strong relationships in women’s health and commitment to minimally invasive innovation make them an outstanding partner as we support clinicians and patients in this important area of care.”

“LiNA is committed to partnering with organizations that bring meaningful innovation to physicians and patients,” said Lars Melbye, President of LiNA Medical USA. “We look forward to working alongside Carbon Medical Technologies to introduce clinicians to Durasphere and InjecSURE.”

Attendees interested in learning more about the collaboration, Durasphere®, and the InjecSURE® System are encouraged to visit LiNA Medical USA at Booth #1745 during the American Urological Association Annual Meeting 2026 taking place May 15–17, 2026.
